ABOUT WILD IRISH

County Wicklow is the home of Wild Irish Game. Three generations of Irish butchers show a deeply rooted love and passion for wild Irish food, making Wild Irish Game Ireland's longest established game processing company, dedicated to supporting, educating and sharing our knowledge about these delicious, traditional foods. This year, we have built a custom-made, state of the art factory for our business in Clane with a 40-45 strong loyal workforce. We pride ourselves in reducing waste on our venison, and with the exception of approximately 0.25kg of bone trim, we use every bit of the venison that we receive from our hunters.

Throughout our years of specialising in wild Irish game, our customers have been reassured by our professional ethics and judgement when it comes to sourcing and producing consistent high quality and high value products. We have acquired consistent BRC AA grade accreditation annually to date for game and meat, currently the only game dealer in Ireland to have this. We are also a member of Origin Green.

All of our wild Irish game is hunted in a responsible, sustainable manner. All our hunters are licensed and trained in food handling hygiene in compliance with Irish and EU legislation. We ourselves organise a course for our hunters annually to ensure their training is kept up to date. We do not condone illegal hunting practices. Our reputation for integrity and transparency will stand any scrutiny in this sector of the food industry. Standards are validated with unannounced FSAI traceability audits and daily sign-off of wild game by a Kildare county council vet, together with unannounced audits by the Department of Heritage, Parks and Wildlife Rangers.
